AUTO SMASH AT MILL ROAD CORNER

The intersection of the Mill road and the Yale road was again scene of an auto accident last Thursday when the Ford coupe driven by G. Parker, a tourist from Saskatchewan collided with an Overland touring car driven by E. Trethewey. The smash was a severe one wrecking both cars. Mrs. Parker sustained a cut hand and her daughter scalp wounds, and the occupants of Mr. Trethewey's car bruised and shaken. The cars were brought to the local garages. After dressing their injuries Mr. and Mrs. Parker and daughter proceeded to Chilliwack by train, where they will remain until it is ascertained if their coupe can be satisfactorily repaired. No blame can apparently be attached to either driver, the accident occurring at a blind corner where it is impossible to see cars approaching from opposite directions.

Following the accident—the third this year at that corner—E. Trethewey called in the ward councillor, W. S. Hill-Tout, who promised teams for grading down the corner if the logs and brush were cleared off in readiness. Realizing the continual danger of this corner to himself and others Mr. Trethewey started on the clearing job by himself and has since bucked off the logs and brushed the corner ready for the grading.

WORK PROGRESSING ON LAKE HIGHWAY

The road from Chilliwack to the big bridge over the Vedder, cut across the lake bed is now being graveled and engineers in charge of the work promise opening of the highway to traffic this year. The road is already graveled from the bridge to the dam. Good gravel for road surfacing has been found in near vicinity of the work and this is being generously used. The route now under construction at the west end is in a direct line with the power plant, and will join the Vye road between Whatcombe road and the B.C.E. sub-station. Later, as part of the inter-provincial highway, the road will relieve the mountain road of fast traffic.

A picnic is being held at Winson's Grove, Huntingdon on Thursday by members of the Men's Club and their families and friends.

A small house and barn belonging to Knight Johnson of Peardonville were burned by bush fires Tuesday afternoon.

While repairing a pump in the well on H. McKinnon's property on Tuesday, W. Roberts was overcome by gas, and only prompt action of G. Hay saved his life. Very few wells in this district contain gas, or afterdamp, as it is called.

Mr. and Mrs. McDaniels announce the arrival of a son, born in the M.S.A. hospital on July 28.

Cow Tests for May

Following is a list of cows in the Sumas-Matsqui Cow-testing Association that gave 50 pounds or more of butter-fat during the month of June. The figures in brackets indicate the number of days since fresh-freshening.

Belle (96) Ayr-Hol, 1734lbs milk, 72.8 fat, H. Day, owner.

Lucky, (55) Gr. Hol, 1350lbs. fat, 66.1 lbs. fat, M. J. Nelles, owner.

No. 29 (30) Gr. Hol, 1476lbs. milk, 61.9lbs. fat, H. Stenerson, owner.

No. 8 (150) Gr. Hol, 1098lbs. milk, 60.3lbs. fat, Mm. Porter, owner.

Ella, (66) Gr. Hol, 1560lbs. milk, 59.2 lbs. fat, R. — owner.

Brindle (131) Gr. Short, 1326lbs milk 58.3lbs. fat, H. Day, owner.

Star (71) Gr. Hol, 1608lbs. milk, 57.8 lbs fat, J. Fishlock, owner.

Bess (96) Gr. Guernsey, 1428lbs. milk, 57.1lbs. fat, H. Day, owner.

Pansy (35) Gr. Hol, 1656lbs. milk, 57.0lbs. fat, J. Fishlock, owner.

Mary (30) Gr. Hol, 1488lbs. milk, 55lbs fat, R. Macchell, owner.

Carmella (60) Gr. Hol, 1710lbs. milk, 54.7lbs. fat, F. W. Rudge, owner.

Inches (30) Gr. Hol, 1215lbs milk, 54.6lbs. fat, F. R. Dempster, owner.

Goidie (36) Gr. Guernsey, 1362lbs. milk, 53.1lbs. fat, L. V. Kearny, owner.

Bess (126) Gr. Hol, 1266lbs. milk, 51.9 lbs fat, L. T. Beharrell, owner.

Cherry (30) Gr. Jersey 972lbs. milk, 51.5lbs. fat, M. H. Hodgson, owner.

Laura (71) Gr. Jersey 1170lbs milk, 51.4lbs. fat, Greenhouse & Dempster, owners.

Mary (149) Gr. Hol, 1284lbs. milk, 51.3lbs. fat, L. T. Beharrell, owner.

Ruby Gr. Hol, 1602lbs milk, 51.2lbs. fat, Farr Bros., owners.

Blue Cow (120) Gr. Hol, 1506lbs. milk 51.2lbs. fat, Starr Bros., owners.

No. 7 (62) Gr. Hol, 1503lbs. milk, 51.1lbs. fat, Wm. Porter, owner.

No. 22 (30) Gr. Ayr, 1335lbs. milk, 50.7lbs. fat, F. W. Rudge, owner.

Alice Gr. Hol, 1404lbs milk, 50.5lbs. fat, W. J. Carlson, owner.

Kitty (60) Gr. Hol, 1365lbs. milk, 50.5lbs. fat, F. W. Rudge, owner.

Daisy (35) Gr. Hol, 1656lbs milk, 50lbs. fat, M. J. Nelles, owner.

Sue 3rd (60) Gr. Hol, 1419lbs. milk, 50lbs fat, Starr Bros. owners.

No. 28 (158) Gr. Hol, 1176lbs milk, 50lbs fat, H. Stenerson, owner.

Queen (38) Gr. Jer. 1152 milk, 50lbs fat, B. H. Hughes, owner.

Laura (30) Gr. Jersey 1950lbs milk, 50lbs. fat, S. Sharpe, owner.

Baby (210) Gr. Jer, 1011lbs. milk 50lbs. fat, H. Day, owner.

THOS. A. MENZIES, Supervisor

Would Establish Game Sanctuary Near Sumas

Two thousands acres of Crown land, covered with cottonwood and brush, and with abundant water holes, situated between the big dyke and the Fraser River, have been proposed as a game sanctuary by Hon. E. D. Barrow. The Minister is putting the suggestion before the Game Conservation Board, also recommending that Goose Lake and a strip between Sumas River and the Mountain be used for the same purpose.

Rev. Mr. MacLean has taken charge of the Mt. Lehman Union Church, Mr. MacLean, a native of Oban-Sell, can speak Gaelic.

Mr. and Mrs. A. McCallum are visiting in Vancouver this week. Their daughter Muriel, who has been visiting in Nanaimo will return with them.

Misses Margaret and Effie Wattie are visiting in Vancouver.

A happy crowd of Abbotsford and St. Nicholas folks held a picnic on Sunday at White Rock.

New "Baby City" of Ontario

(1) North Bay's Main Street.

(2) The Canadian Pacific Station, North Bay.

(3) The Post Office.

An Old Home Week Celebration to celebrate the attainment of City status will be the big attraction for Northern Ontario the first week in August. North Bay, to-day the largest Town in the Province, with a population officially estimated at 13,011, will become the Baby City of Ontario on Sunday, August 2nd. For the following six days, it will be a case of "open house" with all the well-known hospitality of the North Country.

Special services in all the City churches, conducted in most cases by former pastors, who were identified with the early history of the Town, will inaugurate Old Home Week. The following day officialdom takes charge with "Civic Day", when the formal presentation of the City Charter will be made at Memorial Park and representatives of the Federal and Provincial Governments will extend their congratulations to the Gateway City of the North.

A race track has had to be prac-

tically rebuilt, two privately owned parks have had to be taken over for the year and other large expenditures incurred; but the citizens are behind the celebration movement and are determined to make it something that will be long remembered in the Northland.

The history of North Bay is one that is not generally known to all Canadians, even though the name is familiar from the Atlantic to the Pacific, as a great railroad centre. North Bay was originally discovered by Samuel de Champlain in 1615 and was a post on the old trail from the Ottawa to the Great Lakes in the time of the great French explorer.

The first settlements here are recorded as in 1832, with the coming of the first train over the Canadian Pacific Railway. North Bay was never incorporated as a village. Like Topsy, it just grew and became officially a town in 1891. In 1895, the population was 2,024, in 1905 it was 3,813, and in 1915 it was 10,041, and

the last municipal census placed it at 13,011, while the rapid growth of the town this year indicated that it will be at least 15,000 when it takes its position as a City next August.

The Canadian Pacific paved the way for North Bay. The old Grand Trunk followed with its first train in June, 1888. Next was Northern Ontario's own railway, the Temiskaming and Northern Ontario, which was built north to the mining areas from North Bay in 1904, the first train being operated out of here on January 12th, 1905. The Canadian Northern was the fourth line to come in here, their first train arriving on September 14th, 1915.

Three and a half tons of gold bullion pass through North Bay every month from the Northern Mines, together with 13 tons of silver bullion, 503 tons of high-grade silver ores, 6,030 tons of pulp and 12,450 tons of paper. It makes a formidable array when checked up.

Canada's Tied-Up Resources

Parliament, the railways, the Canadian Manufacturers' Association, Labor Unions, and public bodies generally, are still struggling with the problems involved in finding a remedy for the lack of population, recurring periods of unemployment, and slowness of development and prosperity in Canada. That there is something wrong somewhere, all admit, but no two groups are agreed as to the nature of the remedy to be applied.

The railways urge the need of larger immigration in order to overcome the lack of population without which it is argued the natural resources of the Dominion cannot be developed. It is also urged that in the matter of railways, manufacturing industries, and national equipment of all kinds, Canada is over-equipped for its present population, and that, until there is a large consuming population, the railways cannot operate to full capacity, nor can factories be fully manned and operated the year round. Thus we have advocates of a wide open door policy in immigration.

Labor Unions combat this argument and declare that so long as men are out of employment many months in the year because they cannot get work, immigration should be further restricted rather than increased. They claim that instead of bringing more people into Canada, conditions should be so improved here as to provide adequate employment and thus stop the exodus of thousands of Canadians annually to the United States.

The manufacturers have their own pet solution, the sure cure for all Canada's economic ills, namely, higher tariff protection; in other words, the erection of a Customs wall sufficiently high to keep out the manufactured goods of the British Isles and the United States. They argue that if this was done, there would be employment for all Canadian artisans and workmen, but, they contend, they cannot compete with the United States and British manufacturers. Despite these statements and assurances, the fact remains that Canada's present population is too small to absorb the output of its industries, and our manufacturers are competing successfully with United States and British manufacturers in world markets.

There is, however, a basic reason for Canada's economic difficulties and lack of development commensurate with the wealth and variety of its natural resources, but, unfortunately, nobody has the courage to frankly state the difficulty on the floor of Parliament or in open convention of the organizations to which reference has been made.

On more than one occasion in the past the statement has been made in this column that the chief ground of complaint against the Canadian manufacturer on the score of the tariff has been the use made by him of the tariff protection he has enjoyed for the past forty or fifty years; that is, that he has used the tariff merely to add to the selling price of his goods in the Canadian home market instead of using it, as Germany, United States and Japan have used their protective tariffs, to develop their natural resources for use at home and abroad. Instead the Canadian manufacturer has followed the line of least resistance and has gone on importing raw and semi-manufactured materials which by a little initiative and enterprise, and the investment of capital on the part of the Canadian manufacturer, could have been produced in Canada, thereby providing employment, keeping capital at home, reducing costs of manufacture, and reducing the adverse balance of trade as between this country and the United States.

The reason Canada's present population is so small despite the great efforts put forth to attract immigrants; the reason why factories are not busily engaged and fully staffed all the year round; the reason there is an annual exodus of Canadians to the United States; the reason there is unemployment; the reason why our railways are not worked to capacity, is to be found in the fact that to a very large extent the natural resources of the Dominion are still lying dormant, undeveloped for use, and most regrettable of all, are now to a great extent tied up so that their development in the near future is practically out of the question.

In the next article to appear in this column explanation will be made of this last statement and outlining what is considered to be the most serious situation confronting this Dominion and its future, and one which, unless our Federal Government and those of the Provinces which have control of their own resources lose neither time nor courage in dealing with, may result in ultimately breaking the Dominion.

Antique Wallpaper

Antique wallpaper, 200 years old, will be used on the walls of a room being built in the English furniture galleries at South Kensington Museum. The room will be a copy of an 18th century apartment and will contain furniture made at or about the time when Queen Anne died. The wallpaper has been taken from a room in an old house in Gloucester, where it has hung for two centuries.

Canada Enters Butter Competition
A butter competition open to the world has been arranged for in Auckland, New Zealand. Already entries from Estonia, Denmark, the United States, Canada, Australia and Fiji have been received. Experts state that New Zealand has a good chance of winning the championship.

Prince Earns Tenpence

The Prince of Wales drove his train for half an hour in the cotton growing areas of Nigeria. Senior railway officials thereupon presented him with a time sheet showing that the amount due to him was 10d. The Prince smilingly signed the sheet and accepted the money.

For Sprains and Bruises.—There is nothing better for sprains and contusions than Dr. Thomas' Electric Oil. It will reduce the swelling that follows a sprain, will cool the inflamed flesh and draw the pain. It will take the ache out of a bruise by counteracting the inflammation. A trial will convince any who doubt its power.

Mountain peaks 1,650 feet high have been discovered under the sea, 190 miles off the coast of California.

Has Fairly Good Record

League of Nations Gains Ground Although Facing Difficulties
Professor Stephen Leacock, of McGill University, is reported as taking a rather pessimistic view of the possibilities of the League of Nations under present conditions. While he was a strong supporter of the League of Nations he declared that he had no confidence in it as constituted today. Considering what Europe was like before the war, the rather general scepticism about the league when it was formed six years ago and the difficulties which it has had to contend with, it is something that the league has even survived. Where there is life there is hope. And the league has a fairly good record of achievement to its credit. There are enormous difficulties, of course, still in its way, but what has been accomplished so far should inspire faith in the future and greater efforts to see that the ground already gained is not lost.—Winnipeg Free Press.

Swollen Joints, Quickly Limbered Up

Rub On Nerviline

You would be surprised at the wonderful action of "Nerviline" in just such cases. Being thin and not an oil preparation, it is able to penetrate quickly, and down it sinks into the tissues, carrying its healing, soothing action wherever it goes. For stopping muscular or nerve pain, for easing a stiff joint, Nerviline is a complete success. Pain, soreness, stiffness all vanish before the magic power of this wonderful liniment. Nearly fifty years of success proves the merit of Nerviline, which is sold everywhere in large 35 cent bottles.

Honored On King's Birthday

Man Giving Free Blood Transfusions Has Services Recognized

B. W. Bibble, of London, a poor man, received double honors in connection with the King's birthday. He was honored by having conferred on him a medal of the Order of the British Empire, "for public services in saving life," and in addition thereto, the London Hospital elected him a life member of the hospital board.

Bibble's public services, which were thus honored by the crown and the hospital, consisted in giving of his blood for transfusion purposes at the hospital without remuneration. The customary fee for such contributions at the London Hospital is £5.

HELP FOR TIRED NERVOUS PEOPLE

Found in the Use of Dr. Williams' Pink Pills

Are you pale and weak, tired most of the time, out of breath on slight exertion? Are you nervous, is your sleep disturbed so that rest does not refresh you? Is your appetite poor, your digestion weak and do you have pains after eating?

If you have any of these symptoms you need the help of such a reliable tonic as Dr. Williams' Pink Pills. Read what Mr. W. W. Francis, of Calgary, Alta., says of this tonic. "After returning from overseas," writes Mr. Francis, "my whole system was in a badly run down condition. I became nervous, irritable, pale and lost weight. Of course I was given treatment and recommended many tonics, some of which I took, but with no apparent result. At last I could not even sleep. My sister, who is in England, wrote and urged me to give Dr. Williams' Pink Pills a trial, and I can scarcely say how glad I am that I took her advice. My friends were surprised at my complete recovery, but I assured them it was due entirely to Dr. Williams' Pink Pills and I now always keep a box on hand in case of emergency."

If you are willing give these pills a fair trial and they will not disappoint you. Sold by all dealers in medicine or sent by mail at 50 cents a box by writing The Dr. Williams' Medicine Co., Brockville, Ont.

Crop Registration

Nearly Two Thousand Fields Were Registered in 1924

Crop registration service of the Canadian Seed Growers' Association increased by almost one hundred per cent during 1924. In 1923 about one thousand fields were registered and in 1924 nearly two thousand. Averages of seed crops registered last year were roughly: wheat, 17,500 acres, 355,000 bushels; oats, 11,000 acres, 482,000 bushels; barley, 500 acres, 15,000 bushels; flax, 950 acres, 9,200 bushels; alfalfa, 4,000 acres, 480,000 pounds.

Many people are almost crippled with corns. But it is needless suffering which can be speedily ended with Holloway's Corn Remover.

Dickens is said to have written an entire book with one quill pen.

Regular passenger aeroplane services now are being operated in Sweden.

Keep Minard's Liniment in the House

Donates Trophy For Competition

Prince Sends Silver Cup to Banff Golf Club

On more than one occasion the Prince of Wales, during informal visits to his ranch in Alberta, has visited Banff, Alta., and played golf on the "Roof of the World." Last year, during his flying visit to Canada, he again had a round of the links—possibly the most picturesque on the continent. And now, this season, the members of the Banff Golf Club will have the rare pleasure of playing for a trophy from His Royal Highness, a beautiful silver cup with the graceful Prince of Wales' feathers inscribed thereon, which was recently received from London. Needless to say, perhaps, how the golfers of Banff appreciate this unique compliment and how zealously the trophy will be prized and keenly competed for.

Miller's Aform Powders are complete in themselves. They not only drive worms from the system, but repair the damage that worms cause and so invigorate the constitution that it speedily recovers from the disorders of the digestion that are the result of the work of these parasitic intruders. They do their work thoroughly and strength and soundness follow their use.

Revenue From Doll's House

Many Thousands Of Pounds Go To Queen Mary's Charities

It will be remembered that Queen Mary granted permission for the Queen's Doll's House to be placed on view at the Daily Mail Ideal Home Exhibition at Olympia, West Kensington, in March. The result of its exhibition was that £5,500 was paid to the "Doll's House Account," which is devoted to charities in which the Queen is specially interested. In the special pavilion designed by Sir Edwin Lutyens (who also designed the Doll's House) this beautiful model was inspected by 103,226 visitors during the exhibition. This means that about one person in every four who went to Olympia paid to see it. The total of £5,500 was handed to Her Majesty for charity without any deductions whatever.

Trade With North Country

Trading More With United Kingdom and Less With United States

Canada is trading more with the United Kingdom and less with the United States, according to a bulletin issued by the bureau of statistics. Exports to the United Kingdom in the twelve months ending March were \$35,000,000 more than in the year previous. Exports to the United States on the other hand, were \$13,000,000 less. Imports from the United Kingdom were practically the same as the year before, the reduction being only two millions. Imports from the United States showed a drop of \$90,000,000.

Cuticura

Clears The Skin Of Blemishes

If you have pimples or red, rough skin you can rely on Cuticura to help you. Gently smear the affected part with Cuticura Ointment; after five minutes, wash off with Cuticura Soap and hot water. Dry without irritation.

Sample Each Free by Mail. Address: Canadian Depot, 1000-1010, Montreal, P.Q. Price, 25c. Cuticura Shaving Stick 25c.

Delegate From B.C.

Hugh Savage, Director of the C.W.N.A. for British Columbia, and Proprietor of The Cowichan Leader, Duncan, B.C. Mr. Savage will attend the Newspaper Convention at Winnipeg, on June 24, 25 and 26.

Recalls Frog Lake Massacre

Address Given By W. B. Cameron, Sole Survivor of Massacre

Over 300 people assembled at Frog Lake recently to attend the unveiling of a tablet erected to the memory of the men who fell in the Frog Lake massacre in April, 1885.

The gathering was addressed by W. B. Cameron, the only white man who escaped in that affray, and who had come from Vancouver.

Mr. Cameron detailed all the circumstances in connection with the massacre, afterwards taking the people over the ground, indicating where the various buildings were situated, and where the actual shooting took place.

Rev. A. Ahenakew, superintendent of missions to Cree Indians, in connection with the Church of England, also gave an address, in which he interpreted the massacre from the standpoint of the Indian mind.

Improvements For West

Small Amounts Voted in Federal House For Necessary Work

Items for public works expenditure, in Manitoba, totalling \$27,300, were passed in the House of Commons with little discussion.

The vote included the following: Dauphin Beach wharf, \$6,600; repairs and improvements to harbors and rivers generally, \$10,000; Netley cut-closing channel, \$3,500; Portage la Prairie, sewer extension, \$7,200.

A vote of \$24,000 for harbors and rivers in Saskatchewan and Alberta also passed. Provision was made for dredging and cribbing at Blairmore, \$5,000. Improvements in the Cowan Lake and river route, \$2,300 and the Fort Resolution wharf, \$7,500.

HEART TROUBLE

SHORTNESS OF BREATH

Mrs. Geo. E. Bowman, Morrisburg, Ont., writes:—"I am writing you a few lines to let you know of my experience with Milburn's Heart and Nerve Pills. "Two years ago I became very poorly with my heart and nerves and whenever I took the least little bit of exercise my heart would start to jump and flutter. I could not walk upstairs without having to sit down and rest before I was half-way up, on account of my breath becoming so short. I commenced taking

MILBURN'S HEART AND NERVE PILLS

and in no time I felt a great improvement, and can now heartily recommend them to all those who are troubled with any affection of the heart."

H. & N. Pills are for sale at all drug and general stores; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Ideas Are Often Valuable

Sometimes (not every day) a person has an idea. Too often he pays no attention to it. It flits across his mind for a moment. Then he allows his thoughts to go wandering on to something else. The idea dies.

It is by following up their bright ideas that men have become inventors. So the next time an idea comes to you, don't let it go. Grasp it, think about it, and maybe it will bring fame and fortune.

A safe and sure medicine for a child troubled with worms is Mother Graves' Worm Exterminator.

Catches Huge Fish

A sturgeon seven feet six inches in length, seen several times lately at Kootenay Landing, B.C. was caught by W. T. Corman, who sank a hook baited with beef on a clothesline. It weighed 164 pounds.

Britain and Inter-Allied Debts

There will be demagogues in the United States, as well as in the pine debtor countries, who will make use of the debt negotiations to play upon the prejudices of the people. The very fact that in justice we can demand no more of nations owing Great Britain than they pay Great Britain will set our Anglophobes to twisting the lion's tail, a very much abused appendage of a very patient lion.—Cincinnati Times-Star.

No Rest With Asthma.

Asthma usually attacks at night, the one time when rest is needed most. Hence the loss of strength, the nervous debility, the loss of flesh and other evils which must be expected unless relief is secured. Fortunately relief is possible. Dr. J. D. Kellogg's Asthma Remedy has proved its merits through years of service. A trial will surely convince you.

World's Oldest Bush

The oldest bush in the world is in Perry County, Pa., says Dr. Edgar T. Wherry, of the department of agriculture. It is a mile and a quarter long and covers the entire side of a hill. It grows about six inches a year, from which Dr. Wherry estimates its age as 12,000 years.

Children Cry for

Fletcher's CASTORIA

MOTHER:— Fletcher's Castoria is especially prepared to relieve Infants in arms and Children all ages of Constipation, Flatulency, Wind Colic and Diarrhea; allaying

Feverishness arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food; giving natural sleep.

To avoid imitations, always look for the signature of *W. C. Fletcher*. Absolutely Harmless—No Opium. Physicians everywhere recommend it.

Agricultural Possibilities Of The Canadian Northland Are Now Being Demonstrated

Steadily data are being accumulated regarding the agricultural possibilities of the Canadian Northland. Year by year further evidence is obtained showing that the limit of profitable production extends far nearer the Arctic Circle than was at one time taken for granted. The latest official department commentary on this subject is furnished by the report of the experimental sub-station at Fort Vermilion, Alberta, for 1923. Fort Vermilion is farther north than any part of Ontario, and at times the thermometer falls to more than 60 degrees below zero. The mean temperature during the crop season ranges from 6 to 10 degrees lower than during the same months at Ottawa.

Wheat seeding began at the sub-station farm on May 7, and nine varieties were sown on test plots. At harvest they yielded at the rate of from 27 to 59 bushels per acre. The results of the experiments with potatoes were even more remarkable. They show that, in the northern regions, early, deep planting produces the best results. The seed was planted from May 8 to 10, and one variety yielded as high as 419 bushels per acre. Irish Cobbler, a well-known variety, produced 339 bushels per acre.

One variety of garden corn produced a fair percentage of fully-matured though rather small cobs. Garden beans were quite successful, and a large number of other common vegetables produced excellent crops in a very short time. In fact, the short period between the dates of seeding vegetables and the dates when they became fit for use is a striking feature of the rapid growth in the north country, made possible by long hours of warm sunshine. Fine yields of sunflowers for silage were obtained, while the growing period was favorable for hay and a heavy crop harvested.

All these results are obtained under more favorable conditions and by better cultivation than is generally found on farms. Yet they distinctly show that there is a great field for the northward extension of agriculture.

Knew What He Was Doing

Mine Boy Did Not Think Much Of Foreman's Advice

A youth began work in a mine, and his first job consisted of driving one of the pony wagons used for carrying the coal to the elevator.

He got along very well indeed until one day he came to a place where the roof of the "gallery" was far too low to allow the pony to pass. Consequently, he took a pick and commenced to hack away part of the roof.

Immediately a foreman came on the scene and asked what he was doing. The lad explained that he was making a way for the pony to pass. "Now, that's a very dangerous thing to do," said the foreman. "You might bring the whole roof down. What you ought to do is to cut away the floor."

"D'ye think I'm a fool?" retorted the lad. "It's the pony's head that won't go through—not his feet."

Wool Growers Sign Contracts

Saskatchewan and Manitoba Growers Sign Up With Association

Wool growers in Saskatchewan and Manitoba have signed twice as many contracts this year as at the same period last year, states W. Thomson, manager of the Canadian Co-operative Wool Growers' Association in the two provinces. With the majority of the sheep reported to have wintered in fine condition, the 1925 clip should prove of normal quality of good strength.

Tourists For Canada

It is expected that the Rocky Mountains and Western Canada generally will this year be visited by a record-breaking number of tourists from the United States and other parts of the world. Reservations for accommodation already number about 14,000 and they are coming at the rate of about 50 a day. The beauty of the Canadian Rockies and the opportunities which they afford for holidaying and sight-seeing are being more widely appreciated each year.

French Actor Dead

The death is announced of the French dramatic actor Lucien Guiry, 65, former manager of the Theatre de la Renaissance.

Canaries in their wild state were green and had louder and clearer voices than the domestic variety. They were first brought to Europe in the 16th century.

W. N. U. 1581

British Columbia Is Developing Rapidly

C.P.R. Officials Very Much Impressed With Existing Conditions

"After spending ten days on the Pacific coast, I can only say that judging from the amount of sound business activity noticeable there, British Columbia is launching into an era of constructive development which augurs well for her future prosperity," said Grant Hall, vice-president of the Canadian Pacific Railway, Montreal, prior to leaving Vancouver for the east.

"Vancouver, New Westminster and Victoria are all feeling the direct benefits of the large number of important enterprises now in progress on the coast," Mr. Hall further stated, "and all three will reap monetary and publicity benefits from the unprecedented tourist traffic which will move across Canada and through the coast cities during the next three months."

Vancouver Island, the vice-president pointed out, is continually attracting more and more attention throughout Eastern Canada and the United States as the playground of the Pacific Northwest and the opening of the New Crystal Gardens later in the month should do much to increase this interest and materially augment the flow of tourists traffic across the prairies to the coast.

Value Of Newspaper Advertising

Means Of Arousing Interest In Work of Victorian Order of Nurses

The value of newspaper advertising as means of arousing interest in the order's work, was emphasized at the annual meeting of the board of governors of the Victorian Order of Nurses, whose sessions were held at Ottawa recently.

The gathering was presided over by Mrs. Robert Reford, of Montreal, and representatives attended from all over the Dominion. Special attention was paid to the question of raising funds for the carrying on of the order's activities in Canada. Mrs. William Dennis, of Halifax, and Mrs. Rose, of Vancouver, took an important part in the discussions.

A Land Of Schools

America's Creed In Education Says Former British Minister

America is a land of many churches and one creed, all Americans believe in education, according to H. A. L. Fisher, former British minister of education, who has just returned from a tour of the United States.

"The popular enthusiasm which gave Europe its cathedrals," he said, "is now sprinkling the North American continent with schools and colleges in lavish profusion. The sums put into education in America are staggering and are steadily increasing. America's astonishing liberality has conceived the idea of a free, full-time secondary education for all its citizens."

Declares Earthworms Sing

Can Be Heard Twelve Yards Says German Zoologist

Earthworms sing loudly enough to be heard twelve yards away, and their song frequently falls into a syncopated rhythm startlingly reminiscent of jazz, reports a zoologist of Freiburg. In publishing his observations the investigator compares a worm's voice with the percussion of a tiny hammer on a very thin membrane. He intends pursuing his investigations further to learn the situation of the worm's vocal organ.

Canada's Foreign Trade

Recent figures compiled show the value of Canada's imports from all countries for 1925 to be \$795,864,407, compared with \$885,358,688 for 1924, making a decrease in value of \$89,494,281 for 1925. The value of exports from Canada for 1925 is given as \$1,092,551,749, compared with \$1,053,953,665 for 1924, making an increase in value of \$38,598,084 for 1925.

Generous Supply

"I certainly got a bargain when I bought my radio set," remarked young Smith.

"Are you quite sure of that?" questioned Jones.

"There's no doubt about it," was the answer, "After I had assembled the set I had 67 parts left over!"

Women weep audibly when they are angry; silent tears mark the deepest grief.

Wise men never waste their time answering prating fools.

New Western Road Map

Sectional Map Shows Features of the Qu'Appelle River Valley

The topographical survey of Canada, department of the interior, Ottawa, has just issued the Qu'Appelle sheet of the sectional map of Canada. One hundred and thirty-three sheets of this map have already been issued, but this is the twenty-second sheet of this series which shows the topography in a complete form.

On this sheet the outstanding feature is the Qu'Appelle river valley. There are six large lakes or widenings of the Qu'Appelle River shown. Roads are divided into four classes. The inter-provincial road from Winnipeg through Broadview, Wolseley, Indian Head and Fort Qu'Appelle to Regina, Calgary and the Pacific coast is a class 1 road and is shown in red. Class 2 roads, such as Melville to Fort Qu'Appelle and Melville to Yorkton, shown in yellow, are the roads joining towns or other centres of population. Class 3 roads shown by a solid black line are well travelled local roads, generally in good condition, which act as feeders to the first two classes. Class 4 roads shown in broken black lines may be used for wheeled traffic, but are generally little used and in poor condition.

Adjoining sheets of this series, which are to be had in the same revised form, are the Virden, No. 71; Moose Mountain, No. 70; Moose Jaw, No. 69; and Regina, No. 119. It is expected that the Yorkton sheet will be issued in a few months.

Doing Good Work

Canadian Colonization Association Successful In Settling Many Families In West

Six hundred and twenty-four families from across the ocean settled in the west on 187,000 acres of land sold in the fiscal year ending May 31, is the record of the Canadian Colonization Association, of which Col. J. S. Dennis, vice-president of the Canadian Pacific Railway, is president, according to figures given out at Edmonton by the manager, T. O. F. Herzer, of Winnipeg. This organization has been working steadily in bringing new settlers to the west under the auspices of the Canadian Pacific Railway and at the present time an average of sixty families a month are being settled. These people are buying their land and are becoming producers immediately.

Money Spent By Tourists

\$142,405,906 Expended by Visiting Motorists From Other Side Last Year

Nearly two million automobiles were admitted to Canada last year with tourist parties from the United States. Of these, 2,344 took out permits to remain from one to six months, 361,630 entered for two to 30 days, and 1,534,885 entered for 24 hours' visits.

The number of motoring tourists from the United States has nearly trebled since 1920. It is calculated that these visitors spent some \$143,405,906 in Canada last year.

Canadians motoring into the United States for tourist purposes are estimated at 132,475.

Saskatchewan Growing

Nearly 15,000 Immigrants Came to Province In 1924

With a total of 14,955 immigrants coming to Saskatchewan during 1924, the record for the past ten years was broken, according to statistics compiled by the Saskatchewan bureau of labor and industries. Substantial increases are recorded in the number of immigrants from most of the European countries, while the United States supplied 2,324 during the year.

Rocky Mountain National Park

The season of 1924 saw more than 90,000 tourists visit the Rocky Mountain National Park, according to figures recently made public. This was an increase of about 20,000 over the previous year.

Monarch Of All He Surveys

One of the kings of the buffalo herd at Wainwright Park, on the Canadian National Railway east of Edmonton. This splendid specimen of the tribe brooks no interference with his family affairs from the younger males of the species.

An Eastern Editor

Vincent Dubuc, Director of the C.W.N.A. for Quebec, and Proprietor of Le Progres du Saguenay, Chicoutimi, Quebec. He will attend the Canadian Weekly Newspaper Association Convention at Winnipeg, on June 24, 25 and 26.

Strong For Confederation

Inhabitants of Labrador Would Favor Confederation With Canada

Confederation with the Dominion of Canada as a means of solving some of Labrador's chief problems, was advocated by Dr. W. T. Grenfell, of Labrador fame, who arrived from the Orient recently.

"I have come to this conclusion," he said, "after talking and living with the fishermen of the Labrador coast. They are 100 per cent. strong for confederation and it is my personal opinion that Labrador would be better off as a part of the big country. At present 3,000 fishermen on the coast are without a vote in any country."

Dr. Grenfell's new hospital ship, the steamship Anthony, manned and staffed by volunteer workers from various parts of the Old Country, awaits him on the Atlantic coast on his return. His trip around the world was in the nature of a furlough in celebration of his 60th birthday.

The building of an \$80,000 fifty-bed hospital, on the Labrador coast, is the big item on Dr. Grenfell's programme for the present year.

Decrease In Exports To U.S.

Trade Balance For April Was Unfavorable to Canada

Canadian exports to the United States were down in April and the trade balance in that month was unfavorable to the Dominion. In a statement issued by the Dominion bureau of statistics, it is shown that Canadian trade goods to the value of \$27,268,410 were exported to that country while imports from the United States were \$39,851,761. The exports were over \$15,000,000 less than those of March, 1925. For the 12 months ended April 30 exports to the United States totalled \$420,231,394 and imports from that country \$507,740,355.

Fox Farming At Brandon

Farmers Are Taking Great Interest In New Industry

Fox farming in the Brandon district is a growing industry. Many farmers are securing pairs of foxes and are starting on a small scale to experiment with the animals. Last year George H. Fradley dug out and raised 47 red foxes, 22 wolves and a number of skunk. This year he is raising several litters of black foxes, besides the red ones which he captured.

Gold Prospectors Go North

Early summer will see some scores of gold prospectors leaving for the north country, where they will range the valley of the Liard River, approximately 1,000 miles north of Edmonton.

After Mascagni had written "Cavallera Rusticana," he threw it into the fire, but his wife rescued it.

The Flour Milling Industry Has Expanded Remarkably During The Past Few Years

Agriculture and Business

The Present Business Situation Is Normal and Healthy

Agricultural and business conditions during May were on the whole more satisfactory than a year ago. The reports received from various parts of the Dominion show that seeding has been carried out under favorable auspices and that the condition of the soil augurs well for a good yield. Both the wholesale and the retail trade are still being conducted on a conservative scale, but apparently there is a good deal of optimism in the air, for the manufacturing industries show considerable activity. The situation is not the same, however, throughout the entire country, nor in all lines of business, but it is doubtful whether this ideal condition of affairs has ever existed except in times of unusual prosperity. In both Canada and the United States there has been a growing conviction that business has settled down to a fairly long term of quiet but steady growth, and that it is folly to look back upon the condition of business in 1918 or even in 1913 as a permanent normal standard. The sooner we are able, therefore, to realize that the present situation is normal and healthy, the easier it will be for us to deal with any difficulties which may arise. Canada, as well as the rest of the world, has learned to take her losses during the past few years, and will likewise have the courage to adapt her standards and business methods to cope with the facts of the case. We have already seen how easy it is for any much-heralded revival of business along the lines of war-time prosperity to dwindle away into nothingness, and it would therefore be unwise to expect too much of the immediate future; but the present itself is by no means as black as it is sometimes painted, nor should its good points be lost sight of in the hope of what tomorrow may bring forth. The present condition of business should, in fact, inspire every Canadian with confidence.—Bank of Commerce Report.

The report of the flour milling industry of Canada, which gives the standing of this activity at the end of 1923, furnishes evidence of a fine growth, but the record, nevertheless, is inaccurate, at the present time, in view of the notable development which has taken place in Western Canada within the past two years. Occupying, at the time of the last Dominion census, the position of premier manufacturing activity from the standpoint of production, flour milling in Canada continues without much difficulty to maintain this place. The expansion which recent years have witnessed has been wrought very largely by the introduction of British capital, which is gratifying in view of the fact that, in 1921, 54 per cent. of the capital investment in Canadian flour milling was Canadian.

At the end of 1923 there were 560 flour mills and 827 grist and feed mills in Canada, a total of 1,387 mills, with a twenty-four-hour capacity of 127,148 barrels of flour. Ontario led in the industry with 679 mills, followed by Quebec with 436 mills. Saskatchewan had 66; Alberta, 61; New Brunswick, 46; Manitoba, 37; Nova Scotia, 30; Prince Edward Island, 25; and British Columbia, 7. The manner in which this industry is progressing in the prairie provinces is indicated in the fact that whilst the increase in the number of mills during the year is 23 throughout the Dominion, 18 of them are in the prairie area, and this was before the entrance of the Spillers' interest into the field.

In the year 1923 the Canadian flour milling industry utilized 85,699,645 bushels of wheat in the production of 19,075,814 barrels of flour worth \$102,571,212. This was approximately 22 per cent. of the Dominion's wheat production of the year 1922-23. Other products of the industry brought the total for the year up to a value of \$154,895,991. As the domestic consumption of flour in the Dominion is only about one-quarter of this, the industry is largely being expanded with a view to the export trade.

Cannot Use Magnetic Compass At Pole

Twenty-four-Hour Watch Being Made For McMillan

A twenty-four-hour watch may supplant the compass when the amphibian planes assigned to the McMillan Arctic expedition fly under the midnight sun this summer in search of an unknown continent.

The "top of the earth" for flying purposes, may be regarded as flat. Since the sun circles around this region in twenty-four hours, if one lays down a watch with "24 o'clock" pointing to the Greenwich meridian, the hour hand would follow the sun around the dial. In flying, therefore, one has only to keep the hour hand toward the sun and realize that this hour hand not only marks the time, but the exact direction at that time.

"A special twenty-four-hour watch face, which makes allowance for certain variations due to latitude and has only one hand—the hour hand—which casts a distinct shadow, is being made for the use of the flyers at Commander Byrd's request."

(A combined chronometer and sun dial, similar in principle to that described above, was carried by Amundsen in his North Polar flight, the fate of which is still undetermined. Amundsen's instrument was made on his design by the Georzi Instrument Company of Germany.)

Fast Work On Farms

100-Acre Crop Is Seeded In Alberta In One Day

The record established recently at Acme when 114 horses worked in one field at one time seeding the crop of Mrs. C. W. King, has been broken at Gadsby. When the neighbors of J. B. Ball, who recently suffered a broken arm, put in his 100-acre crop, 39 outfits were at work at one time and 175 horses. The crop was put in in a single day.

Crop Outlook

According to a recent report by the Canadian National Railways, the crop outlook in Western Canada is good. Warm weather and considerable rain throughout the prairie provinces made the best possible conditions. The growth is very even at all points and sufficient moisture is now in the ground to ensure rapid progress in the three provinces.

A girl's tongue is the arrow; there's a quiver in her voice, and she soon finds a beau.

Give a business man plenty of rope and he will form a cordage trust.

Success In Western Canada

In a recent issue of the Calgary Albertan, Miss P. Carlyle asserts that any woman who has the ability and determination to win can make good in Canada, and says that she had a net profit from her Canadian farm of about \$4,000 for her first year's labor.

Abbotsford, Sumas & Matsqui News

GERALD H. HELLER Editor and Publisher
Published at Abbotsford, B. C. Every Thursday Phone 58

It is almost impossible to believe that but 100 years ago the first steam engine was completed; yet the centenary celebrations of Stevenson's first effort have just been held in Stockton and Darlington, England. Fifty-one engines were assembled, showing the crude invention of that period and the subsequent improvements of the past generations down to the leviathan expresses of the present day. What a chapter in the development of locomotives it offered to the great crowds that had assembled to witness this display. The spectacle must have been unforgettable, even though mixed with comedy, at the wonder of a hundred years ago. Such a celebration carries a stirring lesson on the progress of this old world during the past century.

Some fellows who get in on the ground floor finish in the basement.

At least 150,000 native sons and daughters of California are now residing in the Eastern States, so we read. Like British Columbia, the Golden State is emerging from the pioneer stage of its development, as evidenced by this exodus East, and by a low birth rate. The conditions are interpreted as follows in the Weekly Bulletin of the California Board of Health:

"California, in common with the other Pacific Coast States, has a low birth-rate....

...It was found that among married women, child-bearing is more universal in California than in that portion of the nation represented in the birth-registration area of the United States, but that California women have smaller families. That is to say, there is a smaller proportion of childless marriages in this State, but the average issue per mother is less than in the registration area as a whole, and the average interval between successive births is greater. The figures indicate that in the registration area 10.6 per cent. of the married women never have children, whereas in California only 6.5 per cent. remain childless. On the other hand, among those women who do have children the average issue is 3.30 per hundred mothers in the registration area, and only 2.66 in California.

Hence, while child-bearing is more general among the women of this State, the early termination of this function on the part of California women, together with the greater intervals between successive births, results in a low birth-rate. The birth-rate is a function of two principal factors, namely, good free land and educational standards. As the one disappears and the other is established upon higher planes, the birth-rate goes down. This has been the history of birth-rate throughout the development of this country. In any area where the free land is all gone and a high birth-rate persists, it usually indicates low educational standards and a reduced degree of average intelligence. In California, not only is the free land all gone but detailed population studies indicate a high general average of intelligence, coupled with advanced educational standards. Only 3.3 per cent. of the population aged ten years or over is illiterate in California, whereas in the areas having the higher birth-rates the proportion runs close to 13.0 per cent. Under these conditions a more general appreciation of the economic stress of raising a family is to be expected.

There was a time when raising a large family simply necessitated cultivating more land, which was to be had for the taking, and children were taken from school and put to work upon it. If there was no good free land locally, a family could "go west." But these conditions no longer exist. We can go west no farther and are now turned back upon ourselves."

Most any woman can learn to like the way her husband makes his money if he only makes enough of it.

"Put out of Business" was the title of an item printed in a Toronto paper a short time ago. It was written by Mr. F. Welsh, president of the Textile Manufacturing Co., and Dovercourt Twine Mills, Ltd., Toronto. The latter business, after being in existence 45 years, with trade extending from coast, was forced to assign about a year ago. Mr. Welsh gives reasons for his company's failure thus:

"The firm had manufactured tennis nets for one thing. We found we could buy in England tennis netting at a price that would enable us to sell about 25 per cent under the cost of Canadian production. Consequently I do not think there is a tennis net being made in Canada today.

Canadians must adopt a national attitude on this tariff question. Objection is made to increasing our rate of customs against the entry of foreign or outside goods, with the statement that the tariff merely makes manufacturers wealthy because they are greedy as a class. Let us take it for granted that they are greedy; the fact then remains that, as the United States protective tariff is three times as high as our tariff, they must be three times as greedy over there. What is the result? The United States is the most prosperous nation in the world. She has the most millionaires of any country in the world, a great many of whom have risen from the ranks. Her working classes work the shortest hours and get the most money. Their standards of living is the highest of any industrial community in the world. Every year, for the past hundred years, she has added a million people per year on the average, to her population. This is the answer to those who pretend a high protective tariff is a curse."

Whatever our political beliefs, we cannot get around the fact that Canada today is a convenient trading jump for the United States, England, Japan, Germany and other European countries. Our tariffs are not adequate to cope with this condition, so destructive that the effects are as keenly felt in British Columbia as in any other part of the country. But the protection that furnished one of the paths to prosperity in the United States cannot be expected to furnish equal blessings to a British Dominion.

Too many women are jealous of their husbands. What a woman ought to do is suspect her husband less and watch him more.

"Cut-Rate" Insurance

Does Not Afford Complete Protection

Insurance, like anything else, is a commodity of comparative quality. In other words you may be paying your premiums to a company of unsound standing—a company that might, in event of your misfortune quibble and contest your claims to avoid full compensation. When you buy insurance of McCallum you are guaranteed complete and sound protection.

Abbotsford branch - F. Marshall, local mgr.

Social and Personal

Mr. and Mrs. E. P. Ruthig and family have gone on an extended holiday in camp at Port Buichon. They have stored their household effects and may possibly make the Delta district their permanent home.

A number of local Orangemen attended the ceremonial corner stone laying of the Royal Protestant True Blue and Orange Home for Children in New Westminster last week. Funds towards this worthy orphanage work are secured each year through the Abbots-May Day fete.

E. Banraalt of Vancouver has taken up residence with his family on the Tibbutt place, Marshall road.

Mrs. Francis and Mrs. Service of Godrich, Ontario, are the guests of their sister Mrs. Straiton, Kilgord.

Mr. and Mrs. McInnis had as week-end guests Mr. and Mrs. Wyckoff and daughter Isabel of Spokane, Wash. and Mrs. Baker and daughter Isabel of Edmonton. Mrs. Wyckoff and Mrs. Baker are sister of Mr. McInnis.

Mr. and Mrs. John McPhee are moving to New Westminster at the first of August, where they will take up residence. Miss Teena McPhee has been appointed to the teaching staff of the Lister Kelvin School in New Westminster.

Mrs. H. Owens is visiting with Mrs. Brown and Mr. and Mrs. Harvey in Vancouver.

Mr. and Mrs. Sougen and family have taken up residence in Mrs. McMenemys house during her absence.

Miss Olive Marshall of New Westminster who has been guest of Mr. and Mrs. F. Marshall during the past three weeks has returned home.

C. Spring and family have gone to New Westminster to reside, where he has obtained work in the Burnette Mills. The Misses Steede are holidaying at Whiterock, Cloverdale, and Gibson's Landing.

Miss Spandier had as recent guests her mother and brother from Vancouver. Mrs. R. Leary and family accompanied by Mrs. J. Stafford and son are camping at White Rock.

Mr. O. W. Benedict expects to leave for the East in the few days. Mrs. Benedict, who has been visiting her mother there will return home with him.

Dr. Ross and family will leave Abbotsford this week-end to reside in Vancouver, and the Doctor will immediately undergo an operation. Mr. and Mrs. J. Gilmore take up residence in their new home early in the week.

Under direction of T. Snashall and N. Hill the boy scouts will go into camp at Cultus Lake on Aug. 10.

Berry pickers at the Curtis ranch held a social and concert on Mr. Curtis' lawn Tuesday night to celebrate closing of the picking season.

Miss Mae Wilson leaves the Royal Bank this week to assist in the Gilmour store. Her place in the bank will be taken by Miss McCallum.

• SYNOPSIS OF • LAND ACT AMENDMENTS

PRE-EMPTIONS

Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emption is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 8,000 board feet per acre west of the Coast Range and 5,000 feet per acre east of that Range.

Applications for pre-emption are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emption must be occupied for five years and improvements made to value of \$10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE

Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes; minimum price for first-class (arable) land is \$5 per acre, and second-class (grazing) land \$2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stumpage.

HOMESITE LEASES

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES

For grazing and industrial purposes areas not exceeding 540 acres may be leased by one person or a company.

GRAZING

Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free, or partly free, permits are available for settlers, campers and travellers, up to ten head.

J. FRITH, Abbotsford

TENDERS

TENDERS will be received by the undersigned until Aug. 1 for the erection of a veranda on the front of the Manse, labor only. The lowest or any tender not necessarily accepted.

MRS. H. FRASER

ABBOTSFORD IN LINE FOR CUP

On Saturday afternoon the Abbotsford baseball team trimmed the Ladner boys 3-1 in nine of the hardest fought innings played this year. Both teams played good ball, but a few costly errors in the fourth inning lost the game for Ladner.

Giffords, Ladner's pitcher, refreshed after a good rest, put over some fast balls, allowing but five hits and striking out 22. Georgie McDonald came a close with him, allowing only two hits and 21 strike-outs in one of the keenest pitching battles ever seen in this league. Fossett, Abbotsford's catcher played good ball, and kept his spurs as the League's best.

Abbotsford and Ladner meet today on the school grounds, and if the home team is victorious, it plays Langley on Saturday. If Cloverdale loses its game to Langley on the same evening Abbotsford will have first place in the League.

Abbotsford is now even with Cloverdale and one of the greatest games of the league is expected on Saturday at Langley when the teams tussle for the cup. Buck Freeman will likely umpire this game, which Ralph Gilmore, manager of the Abbotsford aggregation is quite confident the mill town will win. The first season in the League, the local boys are doing remarkably well as the season was half gone before they even had a practice field. Following is the League standing:

Abbotsford, won 7, lost 4

Cloverdale won 7, lost 4

Ladner won 6, lost 5

Langley Prairie won 2, lost 9.

Miss F. Hill of North Vancouver is holidaying with Peggy Hill.

James & McLaughlin, auto dealers of New Westminster held a sale of used cars in Abbotsford during last week.

My Service

For your convenience, and available at all times is one of the largest and most complete stocks of Groceries, Men's, Women's and Children's Attire Footwear, Hardware, Dry Goods and General Store stocks in the district. Plenty of Fruits and Vegetables -- Without a Quailm

One of the best things about summer is the delicious things it brings to eat.

But when the delicious things crumple you flat on your back, weak as a rag, and as full of pains as a peach is full of juice—that's another story.

The digestive system was intended to handle fruits and vegetables just as comfortably as meats and cereals. If it is lying down on the job, there is a REASON, and that reason is without a doubt insufficient nerve supply. The nerves are pinched between subluxated vertebrae.

Chiropractic handles cases of summer complaint with ease because it gets directly to the cause of the trouble, freeing the pinched nerves and giving the intestines the strength and vigor they need for their work.

See me promptly when such cases happen in your home.

WORLD HAPPENINGS BRIEFLY TOLD

Germany's reparation payments through the office of the agent totaled 100,100,000 marks during May.

The Free State Government has decided to take part in the movement for popularizing Ireland as a tourist resort.

A total of 589,254 spectators, 150,681 of whom were deadheads, attended the Olympic Games last summer, according to official figures.

The Hon. Henry Cockshutt, lieutenant-governor of Ontario, has been elected director of the Canadian Pacific Railway vice Sir Edmund Osler, deceased.

The first Baron MacDonnell, of Swinford, died June 9 in London, aged 81. He will be remembered chiefly for his tenure of office as under secretary for Ireland from 1902 to 1908, when he was Sir Anthony MacDonnell.

Official circles categorically denied the recent report emanating from Paris to the effect that a number of young Germans were enroute to Morocco to become officers under Abd-el-Krim in his war against the French.

Colonel James A. Logan, American observer on the reparations commission in Paris, has resigned for "personal and business" reasons, and his resignation has been accepted by Secretary Kellogg.

The Latvian Parliament has passed a law forbidding the sale of alcoholic drinks at educational institutions, at theatres, exhibitions, fairs, in provision shops, on board vessels in inland waters, on railway trains and in railway stations.

Moving with unexpected speed, the Belgian Government informed the state department, Washington, that it would send a commission the latter part of July to negotiate a funding settlement of its debt to the United States.

Convicts at Sing Sing who can afford it are permitted to have radio apparatus in their cells. About a dozen have taken advantage of the privilege to have whole sets installed and some sixty others have had extension pieces connected with these sets.

T. D. Brown, K.C., of Regina, has been declared elected to the one vacancy on the senate of the University of Saskatchewan, Saskatoon, which was not filled by acclamation this year. He defeated J. F. Bryant, of Regina, and will represent the city of Regina.

Protection for Irish home industries, introduced in the last budget by the Free State finance minister, avowedly as an experiment to see whether it worked and whether it warranted a permanent place in the government's policy, is said to have proved successful.

Decrease In Drug Addicts

Medical Care Instead of Prison Term Is Advocated

There has been a distinct decrease in the number of drug addicts in Canada in the last two years, according to a paper prepared by F. W. Cowan, superintendent of the federal health department, Ottawa, and read by Chief W. C. Crabb, of Welland, Ont., at a session of the 21st annual convention of the Chief Constables' Association of Canada.

The paper contradicted the commonly held theory that use of narcotics caused crime. Narcotic drugs tended to make the addict, if he turned to crime, a criminal of the sneak thief type, and not of the aggressive bandit type. The number of young women and men becoming addicts was on a very definite decrease.

Mr. Cowan advocated medical care and treatment for the addicts rather than prison cells.

Cost Of Shipping Important

Information About B.C. Mines Wanted By British Capitalists

"It is not enough to tell us that you have minerals in your province. Tell us what it will cost to bring them to the market. That is the deciding factor in the development of all properties."

In these words Sir John Davies, of Swansea, one of Great Britain's leading industrialists, advised directors of the British Columbia chamber of mines of the most effective method of bringing British capital into the development of the British Columbia mineral resources.

Wheel Chair Tourist

James Thompson, an invalid for 10 years, is propelling his way across the country from Clovis, N.M., to New York, in a wheel chair. On arriving at Indianapolis he said he sometimes makes 35 miles a day with the assistance of lifts from trucks.

From Down-By-The-Sea

H. B. Anslow, Director of the C.W.N.A. for the Maritime Provinces, and Proprietor of The Graphic, Campbelltown, N.B. Mr. Anslow will attend the C.W.N.A. Convention at Winnipeg, on June 24, 25 and 26.

To Eliminate Poison Gas

Canada Favors Idea of a Conference To Be Held At Washington

Canada at Geneva rallied to the idea of a conference to be held in Washington with a view to outlawing the use of poison gas in warfare, the suggestion having been advanced by T. E. Burton, the United States representative at the present conference on the control of arms. Canadian delegate, Dr. W. A. Riddell, supported the proposal of Mr. Burton. He recalled the fact that it was the Canadian troops—the First Canadian division, who had stood the first shock of poison gas when it was projected from the German trenches at Ypres, in April, 1915, thus emphasizing Canada's interest in any movement that would have for its aim the suppression of this method of waging war.

Thrilled by eloquent appeals from Paul Boncour, France, and Mr. Burton, the conference, at a memorable session, went on record in favor of the immediate framing of a special protocol by which the use of asphyxiating gas in war time henceforth would be outlawed.

The protocol will be open to signature by all nations.

Mr. Burton laid stress on the urgency of doing something definite now to register condemnation of the barbarous poison gas warfare. But he said that if this was found impossible, he was authorized to announce that the president of the United States would be glad to extend an invitation for the convocation of a special conference in Washington.

War Widow Receives Long Missing Locket

Keepsake Worn By Husband In War Returned to Winnipeg Woman

A little gold locket, pathetic in its broken condition, and still bearing vividly the marks of years of exposure on the battlefields of France, has come back home at last. In September, 1916, it hung round the neck of Mrs. S. J. Bevan, of Winnipeg, and enclosed tiny snapshots of her husband and baby girl, Harriet. Today it is in Mrs. Bevan's possession again, but the clasp is gone and the photographs are stained and weather-worn. The baby girl is eight years old, and the father who wore the locket joined the ranks of the heroes who fell at Vimy Ridge. Almost nine years from the day she last saw it, the locket arrived by registered mail, accompanied by a note from the Dominion department of national defence. The letter explained that the keepsake and the pictures had been forwarded from the imperial graves commission to Ottawa, to be sent on to their owner. They had been found on the battlefield, it said. Clearly discernible on the back of the snapshots, themselves blurred almost beyond recognition, are the words, "Baby Bevan," and Mr. Bevan's name and regimental number. He was with the 1st. C.M.R's.

Monoplane Turns Over

A monoplane operated by the Fairbanks aeroplane corporation, carrying three passengers and a crew of two, was damaged when it made a landing recently at Ruby, Alaska. The plane was enroute from Fairbanks to Nome. The machine turned over, but no one was hurt, and the passengers continued their journey down the Yukon River by gasoline launch.

American-Born Canadians

According to the figures of the last Canadian census there are 374,024 residents of Canada who were born in the United States, of whom 237,391 are naturalized Canadians. Of the total of American-born, 244,066 are to be found in Western Canada.

The income tax has been abolished in Newfoundland.

CLIPSE FASHIONS

A Nightgown That Is Practical As Well As Dainty

Almost every home sewer delights in making her own dainty undergarments. There are so many beautiful lingerie materials in the shops that there is no difficulty in finding the right material, whether it be fine nainsook, silk mull, French voiles, cotton crepe or crepe-de-chine. The gown illustrated is very easily made. It may be finished at neck edge and armholes with narrow binding and tied together on shoulders with narrow ribbon bows. The pattern includes a berthia which may be of all-over lace if a more trimmed garment is desired. No. 1029 made in sizes 36, 40 and 44 inches bust. Medium size requires 3 1/2 yards of 36-inch material without the berthia; 5 yards more with berthia.

By Motor To Hudson Bay

Unique Plan Proposed To Use Railway Lines For Motor Cars For Tourists

A procession of tourists driving into the picturesque northland on their own family motor cars, fitted with flanged rims to grip the rails of the Hudson's Bay line, is the ingenious scheme proposed by R. M. Haultain, a railway construction engineer of Winnipeg.

Mr. Haultain believes that such traffic over the government railway will present no difficulties. To obviate any danger of accidents, he would placard the line to the effect that the odd days of the month would be reserved for northbound traffic and the even days for southbound. Each car would be required to carry a light derailing shoe to provide for emergencies.

The investment on the part of the railway company in flanger rims, trailers, steering gear locks, etc., would be negligible, declared Mr. Haultain, when compared with the increased revenue obtained from freighting cars to different points along the Hudson's Bay line.

Mr. Haultain has complete confidence in the feasibility of the scheme and maintains that the north country would ultimately become the mecca of sport lovers and attract tourists to the profitable advantage of the Canadian National system. The line could be placed in the revenue-producing class as the "World's Most Unique Motor Highway," he contended. Mr. Haultain proposes to submit his idea to the railway authorities.

An Ambitious Mushroom

A Nantucket mushroom with a yearning for the sunshine has proved a wonder. A hump was noticed in the concrete walk on Independence Lane. A few days later the surface of the walk was found to be broken. Examination revealed a mushroom, about five inches in diameter, which had forced its way up through two inches of solid concrete.

Birds are wise. They build a new house every spring instead of carrying out the furnace ashes.

To Locate At Winnipeg

Residence of Board of Grain Commissioners To Be Changed

The residence of the board of grain commissioners was changed from the head of the lakes to Winnipeg when the agriculture committee of the House of Commons amended the residence clause in the Canada Grain Act. There was considerable discussion and a majority of the committee favored the change.

Hon. Dr. R. J. Manion, Conservative, Fort William, protested strongly against the recommendation to move the board of grain commissioners from the head of the lakes to Winnipeg, pointing out that Winnipeg was only an exchange and that grain was only inspected there. At the head of the lakes, however, stated Dr. Manion, grain is weighed, stored, hospitalized, trans-shipped and finally inspected into boats.

Hon. W. R. Motherwell, minister of agriculture, disagreed with Dr. Manion. The proper place, he contended, for the location of the board of grain commissioners was at Winnipeg. Mr. Motherwell declared that ninety per cent. of the disputes occurred in Winnipeg and the vicinity.

Hon. T. A. Crerar also took issue with Dr. Manion. The only sensible place, he contended, for the board to be stationed was at Winnipeg.

Auto Plane Is New Racer

London Has a Hybrid Craft to Try For Speed Laurels

A new racing apparatus is being shown at London with which it is hoped to make world records on land. It is a miniature automobile-aeroplane. The front part is that of a motor car, with two wheels on the ground, while the rear is designed along the lines of a flying machine.

This hybrid affair has a powerful engine in front and gets its driving power through the wheels. The body tapers in stream-like form, which ends in a vertical rudder much like that of an aeroplane, and with several curved horizontal surfaces like the elevators of a heavier-than-air-craft.

Standing, the apparatus rests upon its two front wheels, with tail drooping behind, supported by one rear wheel. When it begins to move rapidly the air pressure under the rear elevators causes the tail to lift itself off the ground and sail through the air.

The chauffeur steers by a combination of gears on wheels and the rudder arrangements on the tail.

U.S. Bars Canadian Indians

New Ruling Serious to Those On Coast Reservations

Transportation officials at Victoria were surprised by an announcement from United States immigration officers there that aboriginal inhabitants of Canada were to be treated with the class of races not eligible to American citizenship, and, therefore, not admissible to the United States. It was stated that information of the new order from Washington had come through to the commissioner of immigration in Seattle.

The result of this ruling is that the right exercised from immemorial days of Indians crossing the border freely has been suspended.

Following the United States announcement, W. E. Ditchburn, Indian commissioner, wired Ottawa, and pointed out how serious the embargo would be to the Indians on the coast reservations and asked that the matter be taken up in Ottawa and representations made to Washington.

New Grain Inspection District

Moose Jaw To Be Made A Grading Point This Fall

The Federal Government intend to create a new grain inspection district at Moose Jaw.

At the present time there are but two inspection and grading points on the prairies—Winnipeg and Calgary. A third, it is said, will be set up in Moose Jaw this autumn.

The cost of creating such an organization will be not less than \$80,000. As most of this is represented in salaries the annual expenditure would be about the same.

Urges Intimate Business Relations

The need of more intimate business relations between Britain and Canada and more British capital invested in the Dominion was stressed by F. W. Field, His Majesty's trade commissioner in Canada and Newfoundland, in a speech delivered at the Victoria Square Empire Day celebration.

Contracts For Warships

Contracts for Australia's two 10,000-ton cruisers and two submarines, have been placed in Great Britain, the amount aggregating £3,500,000.

Take heart. People never knock unless they envy, and they never envy their inferiors.

Algarsson Abandons North Pole Flight

May Try Next Year If Given Financial Support

Gretir Algarsson has definitely abandoned his flight to the North Pole for this year owing to the lateness in the delivery of his airship, according to Commander Worsley, the second in command. "We now propose," says Commander Worsley, "to proceed to Spitzbergen to carry out geographical and scientific work there in the hope of obtaining information about air currents and data as to conditions preparatory to a flight next year. The British Columbian airman needs more financial support if the expedition is to have any hope of success next year or indeed if it is to be undertaken at all."

Communists In Britain

Only 5,000 Professed Reds In British Isles

Although a certain section of the press give lurid accounts of British Communist congress held at Glasgow, other sections announce that the whole Communist movement in Great Britain has only 5,000 professed adherents, whose actions are followed with tolerant amusement by the ordinary working man and scornful contempt by the old-fashioned trades union leaders. The speeches at this convention appear to have followed lines already familiar to the public. One orator, a Greenock boy of 12 years of age, headed his Greenock contemporaries and proudly announced that they comprised the vanguard of a "revolutionary army."

Eating Up Our Income

More Than One Quarter of Earnings Go For Food

North Americans literally eat up their income. Ten years ago one-fifth of one's earnings was deemed sufficient for food. Today the figure has risen to 27 per cent.—more than one-fourth.

Last year, says Dr. Paul H. Nyström, head of the Retail Research Association, the total estimated income on this continent was 68 billion dollars. Almost half went to retail stores. More than 18 billions went for food, tobacco and soft drinks.—Vancouver World.

Illuminated Animals At Wembley

The illuminated animals at Wembley on the lawn are a quaint innovation. There is a vicious-looking crocodile with a most baleful gleam in his electrical eyes, huge toads, and glowing squirrels that scamper up a tree. But the affections of the young visitors will centre in the illuminated white rabbit. He is quite jolly enough to hug and not rather alarming like the crocodile.

Olive trees more than 1,000 years old are found on the island of Majorca.

New Mounted Police Post

Administering the Law in the Northern Parts of Canada

George P. MacKenzie, formerly gold commissioner in the Yukon Territory, will be in charge of the party going north this summer under the direction of the department of the interior on board the Arctic.

The Arctic will pay the usual visits to the northern outposts, and will carry Mounted Police to relieve those patrols which have been in the north since last year.

The department will continue to carry on the work of administration of the northern islands, and a new post will probably be established on Ellesmere Island.

For Fish Culture

Federal Government Votes Money For Fish Propagation

A vote of \$370,000 for fish culture was carried in the House of Commons. In addition to a number of other items, including \$30,000 for the building of fishways and clearing waters, \$95,000 to assist in the conservation and development of deep sea fisheries, \$2,000 for the maintenance of the fisheries intelligence bureau, and \$10,000 to provide for investigations into practical and economic problems connected with fisheries.

Nothing Coming To Him

A man once rented a plot of ground to a negro neighbor, upon which corn was to be planted, and at harvest time the renter was to receive one-fourth of the yield. Meeting the negro during harvest time, he asked:

"Look here, Sam, have you harvested the corn?"

"Yea, sah, boss, long ago!"

"Well, wasn't I to get one-fourth?"

"Yea, boss, that's the truth, but there wasn't no fourth! Der was jes, three loads, and dey was mine."

Farmers To Benefit

Ontario farmers benefit to the amount of about \$42,560 annually through the reduction made by the provincial government of the interest rate on farm loans from a 6 to 5 1/2 per cent. rate now in effect. Farm loans are affected to the amount of \$8,500,000.

A French doctor has made 16 successful transfusions of animal blood into men.

Copyrighted, 1922, by Rafael Sabatini
"CAPTAIN BLOOD," a Vitaphone picture with J. Warren Kerrigan
in the title role, is an adaptation of this thrilling novel.

CHAPTER XXIII.—Continued.

"Perhaps it will be best," M. de Rivarol took up a paper. "Before going further, I have to observe that M. de Cussy has exceeded his instructions in admitting you to one-fifth of the prizes taken."

"That is a matter between yourself and M. de Cussy, my general."

"Oh, no. It is a matter between myself and you."

"Your pardon, my general. The articles are signed. So far as we are concerned, the matter is closed."

"But, mon Dieu! It is your concern, I suppose, that we cannot award you more than one-tenth share."

"You are quite certain of that, M. le Baron; that you cannot?"

"I am quite certain that I will not."

"In that case," said Blood, "it but remains for me to present my little account for our disbursement, and to fix the sum at which we should be compensated for our loss of time and derangement in coming hither. That settled, we can part friends, M. le Baron. No harm has been done."

"What the devil do you mean?"

"Is it possible that I am obscure? My French, perhaps, is not of the purest, but—"

"Oh, your French is fluent enough; too fluent at moments, if I may permit myself the observation. Now, look you here, M. le Filibustier, you have accepted service of the King of France, you and your men. The first obligation of an officer is obedience. You are not to conceive yourselves, as you appear to be doing, my allies in the enterprises I have in view, but my subordinates. In me you behold a commander to lead you, not a companion or an equal."

"Oh, be sure that I understand," Captain Blood laughed. He was recovering his normal self amazingly under the inspiring stimulus of conflict. The only thing that marred his enjoyment was the reflection that he had not shaved. "I forget nothing, I assure you, my general. I do not forget, for instance, as you appear to be doing, that the articles we signed are the condition of our service; and the articles provide that we receive one-fifth share. Refuse us that, and you cancel the articles; cancel the articles and you cancel our service with them. From that moment we cease to have the honor to hold rank in the navies of the King of France."

Captain Blood rose, his officers rose with him. Captain Blood bowed.

"M. le Baron!" said he.

"You shall be advised of my resolve," M. le Baron retorted.

NERVOUS BREAK-DOWN

Pains in Back and Legs Relieved by Lydia E. Pinkham's Vegetable Compound

Ford, Ontario.—"I had a nervous break-down, as it is called, with severe pains in my back and legs, and with fainting spells which left me very weak. I was nervous and could not sleep nor eat. I should and spent much time in bed. I was in this state, more or less, for over two years before Lydia E. Pinkham's Vegetable Compound was recommended to me by my neighbor. Before I had taken five doses I was sitting up in bed, and when the first bottle was taken I was out of bed and able to walk around the house. During my sickness I had been obliged to get some one to look after my home for me, but thanks to the Vegetable Compound I am now able to look after it myself. I have taken Lydia E. Pinkham's Blood Medicine in turn with the Vegetable Compound, and I certainly recommend these medicines to any one who is not enjoying good health. I am quite willing for you to use these facts as a testimonial."

Mrs. J. SHEPHERD, 130 Jos. Janisse Avenue, Ford, Ontario.

Nervousness, irritability, painful times, run-down feelings and weakness are symptoms to be noted. Women suffering from these troubles, which they so often have, should give Lydia E. Pinkham's Vegetable Compound a fair trial. All druggists sell this medicine.

Dairying in Manitoba

Industry Has More Than Doubled During Past Year

Dairying and livestock raising is on the increase in Western Canada and in the districts of Manitoba where mixed farming is practiced the dairy business has been more than doubled over that of a year ago. While some few points report fewer livestock being handled, the majority of districts tell of increases both in winter feeding and in dairying.

That resolve proved to Captain Blood's way next official business brought these two together. Wolvenstone was the cause of Captain Blood hunting audience with the admiral while he sat at dinner. The Old Wolf had retorted with his ready fist a mocking Frenchman's remarks and had been flung in jail. M. de Rivarol bade his visitor be admitted.

There entered now into his presence a spruce and modish gentleman, dressed with care and somber richness in black and silver, his swarthy, clear-cut face scrupulously shaven, his long black hair in ringlets that fell to a collar of fine point. In his right hand the gentleman carried a broad black hat with a scarlet ostrich plume, in his left hand an ebony cane. His stockings were of silk, a bunch of ribbons masked his garters and the black rosettes on his shoes were finely edged with gold.

"Your people have arrested the wrong man, M. de Rivarol," Captain Blood began. "Instead of the French officer, who used the grossest provocation, they have arrested Captain Wolvenstone. It is a matter which I beg you to reverse without delay."

"Sir, you—you are insolent! But of insolence that is intolerable!"

"My superior officer! You! Why, you are just a common pirate!"

He stalked out, and his three captains, although they thought him mad—rolled after him in loyal silence.

Nevertheless, it was to Cartagena that they sailed in the middle of March. Volunteers and negroes had brought up the forces directly under M. de Rivarol to twelve hundred men. With these he thought he could keep the buccaneer contingent in order and submissive.

They made up an imposing fleet, led by M. de Rivarol's flagship, the Victorieuse, a mighty vessel of eighty guns. Each of the four other French ships was at least as powerful as Blood's Aradella, which was of forty guns. Followed the lesser buccaneer vessels, the Elizabeth, Lachesis, and Atropos, and a dozen frigates laden with stores, besides canoes and small craft in tow.

(To be continued)

Unique Cure For Seasickness

Moving Picture Director Is Conducting Experiments At Hollywood

An experiment in the filming of moving pictures for exhibition on ocean passenger liners as a cure for seasickness among passengers is being conducted at Hollywood, Cal., by Robert G. Vignola, a director.

The cause of seasickness, the director declares, is largely visual, predicated on the shifting planes which characterize the motion of a ship. The larger ocean passenger carriers are now equipped with exhibition cameras and screens, and it is Vignola's belief that pictures can be made for exhibition on shipboard which will counteract the effect of the ship's motion and save the most susceptible passenger from the horrors of mal de mer.

More Auto Tourists Coming From States

Number Has Already Tripled In Last Four Years

Nearly 2,000,000 automobiles were admitted to Canada last year with tourist parties from the United States. Of these 2,344 took out permits to remain from one to six months, 361,630 entered for two to thirty days, and 1,534,885 entered for 24 hours visits.

The number of motoring tourists from the United States has nearly tripled since 1920. It is calculated that these visitors spent \$143,405,906 in Canada last year.

Canadians motoring into the United States for tourist purposes are estimated at 162,475.

Hardy Conifers Thrive On Prairies

Tests made at the forest nursery stations of the forestry branch of the department of the interior, show that hardy conifers such as spruce, lodgepole pine, jack pine and Scotch pine are particularly suited for prairie planting and thrive under adverse conditions. These trees are now being widely planted throughout the prairie provinces.

"I hate this job of thinning out my eyebrows," said the girl at the mirror.

"It certainly takes a lot of pluck," said her room-mate.

that you confirm or that you repudiate them?"

"I have considered that, too," he announced. "And whilst my opinion remains unaltered, I must confess that since M. de Cussy has pledged us, it is for us to fulfill the pledges. The articles are confirmed, sir."

Blood and his officers were summoned a week later to a council which sat to determine their operations against Spain. M. de Rivarol laid before them a project for a raid upon the wealthy Spanish town of Cartagena, which was rich in gold loot.

Captain Blood professed astonishment. Sourly invited by M. de Rivarol to state his grounds for it, he did so with the utmost frankness.

"You mean, sir, that we are to sail across the Caribbean on an adventurous expedition, neglecting that which lies here at our very door. In our absence, a Spanish invasion of French Hispaniola is possible. If we begin by reducing the Spaniards here, that possibility will be removed. We shall have added to the Crown of France the most coveted possession in the West Indies."

Captain Blood laughed outright. He had suddenly read the Baron's mind. M. de Rivarol, intrigued by his mirth, scowled upon him disapprovingly.

"Why do you laugh, monsieur?"

"Because I discover here an irony that is supremely droll. You, M. le Baron, General of the King's Armies by Land and Sea in America, propose an enterprise of a purely buccaneering character; whilst I, the buccaneer, am urging one that is more concerned with upholding the honor of France. You perceive how droll it is."

"M. le filibuster," cried Rivarol in a thick voice, "it seems that I must again remind you that I am your superior officer."

"My superior officer! You! Why, you are just a common pirate! M. le Baron, I have the honor to wish you good-day."

He stalked out, and his three captains, although they thought him mad—rolled after him in loyal silence.

Nevertheless, it was to Cartagena that they sailed in the middle of March. Volunteers and negroes had brought up the forces directly under M. de Rivarol to twelve hundred men. With these he thought he could keep the buccaneer contingent in order and submissive.

They made up an imposing fleet, led by M. de Rivarol's flagship, the Victorieuse, a mighty vessel of eighty guns. Each of the four other French ships was at least as powerful as Blood's Aradella, which was of forty guns. Lower Interest Rates

Considerable Foreign Money Being Loaned On Alberta Property

Alberta financiers have noticed a new influx of foreign money, which is being loaned on city property in the province at a rate as low as 7 per cent. While not much British capital has been noticeable in the west this spring, Dutch financial concerns are heavily interested in new loans.

The Best Remedy For Kidney Trouble

Quebec Lady Recommends Dodd's Kidney Pills to all Sufferers With Bad Kidneys

Madame G. Boudart Was Almost Unable to Work and Found Relief in Dodd's Kidney Pills.

Val Barrette, Que.—(Special).—"I have suffered so much from bad kidneys," states Madame G. Boudart, a well-known resident of this place, "I was almost unable to work any more and it was necessary that I walked every day. I have taken several boxes of Dodd's Kidney Pills and am now quite well. I always keep them in the house. I take a box from time to time and that keeps me well. I advise all those who suffer with bad kidneys to do the same as I have done."

The sooner any person who perceives symptoms of these horrible and painful disorders brought about by bad kidneys, takes a reliable remedy, the better for their future welfare and happiness. Don't wait for relief to come of its own accord. See to it at once. Take Dodd's Kidney Pills. But, do it now!

Willing to Wait
Salesman (at motor show).—"This is the type of car that pays for itself, sir!"

Prospective Buyer.—"Well, as soon as it has done that you can have it delivered at my garage."

Sores Heal Quickly.—Have you a persistent sore that refuses to heal? Then, try Dr. Thomas' Electric Oil in the dressing. It will stop sloughing, carry away the proud flesh, draw out the pus and prepare a clean way for the new skin. It is a recognized healer among oils and numbers of people can certify that it healed where properly applied.

The golden rule measures twelve inches to the foot.

Figures may not lie, but estimates have been known to mislead.

Limber Up

Your stiff muscles by rubbing well with Minard's. Leading athletes use it. Splendid for sprains and bruises.

Impressive Religious

Service At Wembley

Ceremony Held on Empire Day Broadcast to Millions

Almost 250,000 people gathered with their Majesties the King and Queen at Wembley Stadium, May 24, for the Empire thanksgiving service. The proceedings constituted a display of ecclesiastical and military pomp rarely beheld even in the heart of the British Empire and in view of the fact that the service was broadcast to millions of people over the radio the event may be considered the largest religious service the world has ever known. The highest pitch of enthusiasm was aroused by the marching and counter-marching of the Brigade of Guards to the music of their massed bands.

A fanfare of state trumpeters heralded the arrival of the King and Queen, who were received with vociferous cheers. The cheering was succeeded by reverent silence when the first procession entered.

The most poignant spectacle, which brought tears to the eyes of thousands of beholders, was the little string of sightless men from St. Dunstan's, who with linking arms, marched with unerring step across the great arena followed by the rising generation represented in the school cadets and the naval and military orphanages.

The service itself was constructed along simple lines, the mighty congregation uniting in the Lord's Prayer and joining right heartily in the singing of "Onward Christian Soldiers," "All People That On Earth Do Dwell" and "Now Thank We All Our God." A Free Church minister read the Scriptures and the Archbishop of York delivered the sermon.

Minard's Liniment for Corns and Bunions

Steady Market For Souvenirs Of Brazil

Jewelers Carry On Large Trade With Tourists

Rare the tourist who does not leave Brazil with a souvenir in the shape of a semi-precious stone or the colorful wing of a butterfly. Some buy the stones in large numbers, for a Rio de Janeiro jeweler declares he has sold approximately 4,000 aquamarines, for about \$20,000, to the 385 Americans on board a tourist steamer recently in the harbor.

Large blue butterfly wings, the Mospho, mounted in glass trays, sell at the rate of about 10,000 pair a year, and there is a steady market for green beetles mounted as scarf pins.

Cost of Pensions

Canada spent \$49,056,179 last year for pensions and re-establishment of veterans of the Great War, according to a report of the department in charge of this work.

For Aches and Pains Use Minard's Liniment

Canadian Timber For New York

The demands of American users have already aroused in the Canadians a fear for their forests. New York states uses four times as much timber as she cuts and she cuts five times as much as she grows each year.

HEALTHY CHILDREN ARE HAPPY CHILDREN

The well child is always a happy child—it is a baby's nature to be happy and contented. Mothers, if your little ones are cross and peevish and cry a great deal, they are not well—they are in need of a medicine—something that will set their bowels and stomach in order, for nine-tenths of all childhood ailments arise from a disordered state of the bowels and stomach. Such a medicine is Baby's Own Tablets. They are a mild but thorough laxative which regulate the bowels, sweeten the stomach and thus drive out constipation and indigestion; banish colic; break up colds and simple fevers and make the baby healthy and happy. The Tablets are guaranteed to be absolutely free from opiates or other harmful drugs—they cannot possibly do harm—always good. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

The successful honey dealer is on a bee-line to prosperity.

It's natural for people to talk, but they must be taught silence.

For Quick Hot Water

Fill an SMP Enamelled Tea Kettle. Set it on the stove. No Kettle will boil water quicker. That means convenience, time saved, too. All SMP Enamelled utensils are very fast coming to the boil and in their job of cooking. Not only quicker to cook with, but easier, more quickly cleaned after. The best any way you look at it. Think this over.

ROAD FOREMAN IN AUTO COLLISION

On his way home from Westminster Road Foreman W. J. Sayce was the near victim of an auto accident on the Pacific Highway on Sunday evening which resulted in Robert McElroy sustaining a fractured skull, recovery from which is doubtful. McElroy, returning from White Rock was proceeding along the Highway near the Serpentine bridge ahead of a string of cars traveling west. A Chevrolet car among them broke out of line with the queue and speeded along at about 40 miles an hour on the wrong side of the road in an effort to get ahead of McElroy's car. To avoid a head-on collision, Sayce pulled his car over to the edge of the road and stopped. Rushing in between the two cars the Chevrolet hit the front wheel of McElroy's car, overturning it, and driving away. McElroy's condition has subsequently improved. The number of the Chevrolet was not taken.

Harvest In Progress On Lake Lands

Harvesting activity in the Sumas lake district is not confined this year to the private lands. Out on the lake bed several teams and tractors are now busy with the hay and 600 acres of fine wheat and oats rapidly ripening for the binder. Some fine crops of barley, peas and garden truck are also growing. Timothy, standing up to five feet high, and covering an area of several thousand acres is now falling before the binder. Clover is another crop appearing well, growing thick everywhere sown, and helping to bind crops sown on the sandy areas. A new barn has been built to accommodate the government teams and enough clover hay to feed them through the winter. The harvesting crews are under direction of Capt. Rowberry, who is responsible to the Land Settlement Board.

Open dates for ducks, rails geese and brant set for this year under the Migratory Birds Convention Act are set as follows: ducks and rails Oct. 15 to Jan. 31; geese and brant Nov. 1 to Feb. 15 both dates inclusive

The Auto Club of Washington is recommending to the U.S. customs department that steps be taken to apprehend intoxicated drivers at the boundary instead of allowing them to proceed over the Washington highways.

Jack White, hotel man of Vancouver has purchased the Aldergrove hotel from J. F. Higgins.

Mrs. Plaxton and son Jack have returned home from camping at White Rock.

Eric Weir has left for a trip to Ashcroft.

Japanese Alpinists Climb at Jasper

HEADED by Yuko Maki, under secretary of the Japanese Alpine Club, six noted Japanese Alpinists have left Jasper Park Lodge, at Jasper, Alberta, for a twenty-five days' trip into the Columbia Icefield, one of the least-known portions of the Canadian Rockies. Their trip will take them to the headwaters of the Athabasca and North Saskatchewan Rivers, and an endeavor will be made to climb Mount Alberta, a virgin peak which has so far defied all efforts to conquer its higher slopes. Members of the party state that if the territory lives up to their expectations it will attract hundreds of Japanese Alpinists annually. The expedition is elaborately equipped scientifically and the equipment includes still and motion picture cameras and a complete dark room with which pictures will be developed in the field. Three Swiss guides, Heinrich Fuhrer, Hans Kohler, and Jean Webber, from Jasper Park Lodge, are accompanying the party and five guides and forty horses from the outfitting stables of Fred Brewster, are being used on the trip. This is the largest party which has left the Lodge this year, and the first party of Japanese Alpinists to tackle some of the untried fields of the Canadian Rockies.

The party is shown ready for the start from the Brewster ranch. Left to right—N. Okabe, M. Hatanaka, Y. Mita, S. Hashimoto, Y. Maki, Fred Brewster, Outfitter; H. Fuhrer, J. Webber, H. Kohler, Swiss Guides.
